

3 November 1972

MEMORANDUM FOR: Executive Officer, Office of Scientific Intelligence  
SUBJECT : Review of Documents for Department of State  
"Foreign Relations" Series

Tom,

1. Forwarded herewith is the most recent set of galley proofs received from State for review. All are intended for the Atomic Energy Section of the Series for 1948.
2. Bernie Drell has set this up with precis in an effort to make it as easy as possible for the reviewers. His memorandum explaining what he has done is included in the folder. Even so, it will be a lot of work for someone.
3. It will be appreciated if the review could be completed by 24 November. Also, our preliminary look at the material indicated OSI is the only component of the Agency which have an interest to protect. If, in your judgement, there are other components with an interest, please advise.
